

Electrical Requirements and Information

Requirements

- Permits are required on all new buildings, additions and replacement installations.
- **Contractor:** Electrical, Plumbing, HVAC, Sewer Builders and General Contractors are required to be registered with the City of Painesville before doing any work in the City.
- **Homeowner:** A homeowner may obtain permits only when they are the owner/occupant and will perform the work themselves.
- Permits must be obtained prior to the start of any work and are required to be displayed at the work site. If you have hired a contractor to perform the work, make sure he/she displays the required permits.

Required Inspections

Electrical inspections are necessary to ensure that electrical wiring, equipment and systems are installed in accordance with code requirements that are intended to safeguard health, safety and welfare of building occupants. Inspection services validate that work performed complies with the scope detailed in the permit description and/or approved plans. Below is the order of the required inspections. It is mandatory that you schedule each of the necessary inspections.

Required	Required Inspections	Date/Time
<input type="checkbox"/>	Call 440-392-5931 at least 24 hours before the desired inspection	
<input type="checkbox"/>	Rough Electrical Inspection – after all ducts, dampers, etc. are roughed in.	
<input type="checkbox"/>	Final Electrical Inspections – final on electrical
