

ATTENTION

A notification was left recently advising that you boil water drawn for consumption from these premises. Test results have confirmed that the water is safe for consumption. Boiling is no longer recommended as necessary.

**THANK YOU FOR
YOUR PATIENCE**

ATTENTION

A repair to the water main in this immediate area was just completed. Because the main had to be shut down to affect this repair, the following advisory is necessary:

**All water drawn from
these premises for consumption
should be boiled for 5 minutes prior to use.**

PLEASE NOTE: Nothing has been found wrong with the water; this is a precaution. Boiling your water for 5 minutes at a rolling boil is advised for the immediate area only. It is not necessary citywide. Tests have been initiated to confirm that the water is safe. Once this confirmation has been made, a green hanger similar to this will be placed on your door to notify you the advisory has been lifted.
