Project Background

Existing Facility Opened: January 1990

- 353 Bed Capacity
  - 100 inmates under the Lake County Court system were brought over in 1990
- Current facility is full and significant rehab is needed
- Average Daily Population: 330
- Operational challenges:
  - Male vs. Female inmates compared to 1990
  - Misdemeanants v. Felons compared to 1990
- Inadequate medical facilities
- Operational challenges associated with mental health and substance abuse

Project Background

- Inadequate space for substance abuse programs and training
- Inadequate space for mental health counseling
- Undersized service areas (ex. kitchen & laundry)
- Additional space for Adult Probation
- Need for additional space for Sheriff's Office Administration:
  - General office, conference and training space
  - SWAT
  - Evidence storage

Project Background

- Since 2014 three (3) major studies have been done on the jail:

  2014: Lake County Public Safety Complex (Feb. 2014)
  2018: Lake County Jail Façade Evaluation Report
  2019: Lake County Ohio Jail Analysis (Aug. 2019)

  - The jail requires millions of dollars in renovations and recommended the jail needs replaced
  - All mechanical systems and elevators are at “end of life” and jail renovation would not create the needed beds to handle the expanding jail population into the future
  - Roof needs complete removal / replacement
  - Lack of flexible space for training
